

Where clause

Q what is where clause in SQL?

Ans: WHERE clause restricted the record means those records are unmatched in where clause condition, eliminated from the table.

Use of where clause:

Syntax:

i) Select * from table-name Where Condition

player

Rank	Name	Best
1	Virat	183
2	Dhoni	183
3	Rohit	264
4	Dhawan	143
5	Sachin	219

Select * from player where Rank = 3;

O/p:

Rank	Name	Best
3	Rohit	264

Agar Sirf Ek column chahiye:
eg: Name

Select name from player where rank = 3;

O/p:

Name
Rohit

i) Update table - Name Set Column - name = New - data
where condition;

maan to given table mey koi naam ya something
galat diya ho b. usey hume change karna hai

⇒ update player set name = 'Sachin' where
test = 219;

To check O/P :

Select * from player;

The complete updated table will appear.

ii) Delete from table - Name where condition;
maan to dhawan waala record delete karna hai

⇒ delete from player where rank = 4;

To check O/P:

Select * from player;

4th row will be deleted.

Rank	Name	Best
1	Virat	183
2	Dhoni	183
3	Rohit	284
5	Sachin	219
